SUMMARY

AI Automation Engineer with a 4-year full-stack development background, building multi-agent workflows, RAG pipelines, CRM integrations and marketing-attribution automations with Python, LangGraph, n8n, Make.com and REST APIs. I connect ads, websites, CRMs and LLMs into reliable, tested pipelines for international clients.

TECHNICAL SKILLS

AI & Agents	LangGraph, LangChain, Temporal, RAG, LLM APIs (Claude/OpenAI), Prompt Engineering, pgvector, Pinecone
Automation	n8n, Make.com (webhooks, routers, data stores, HTTP modules), Zapier, REST APIs, Webhooks, Playwright browser automation
CRM & Tracking	HubSpot (pipelines, properties, CRM v3 API), Google Tag Manager, GA4 (events, key events, Measurement Protocol), Google Ads (offline & enhanced conversions), Meta Pixel, CallRail, Consent Mode v2
Back-End & Data	Python, FastAPI, Node.js, PHP/Laravel, PostgreSQL, MySQL, Redis, Prisma, Google Sheets, Looker Studio
DevOps & Testing	Docker, GitHub Actions CI/CD, AWS, Vercel, Railway, Pytest, PHPUnit

PROFESSIONAL EXPERIENCE

AI Automation Engineer & Full Stack Developer — BixoSoft 2023 – Present

- Built and shipped an autonomous AI agent for CEO/B2B outreach: an event-driven multi-agent pipeline on LangGraph and Temporal with FastAPI services, PostgreSQL/Prisma and Redis queues, running multiple concurrent campaigns.
- Delivered 25+ business-process automations in n8n, Make.com and Zapier connecting CRMs, webhooks and LLM APIs, eliminating roughly 15 hours/week of manual data entry and follow-up.
- Built an end-to-end ad-to-revenue attribution system for a home-services client, linking ad clicks across 4 lead channels to HubSpot deals and sending closed revenue back to Google Ads.
- Containerized services with Docker and set up GitHub Actions CI/CD pipelines for automated testing and deployment.

Freelance Full Stack Developer — Self-Employed 2022 – Present (part-time)

- Delivered web solutions, CRM systems and business dashboards for 15+ clients, including API integrations, webhooks and payment gateways.

KEY PROJECTS

Ad-to-Revenue Attribution System — BixoSoft client Sep – Oct 2026

Make.com · HubSpot · GTM · GA4 · Google Ads · Meta Pixel · CallRail · Looker Studio · Laravel

- Tracked every lead from ad click (gclid/fbclid/UTMs) to closed revenue across 4 channels: web form, online booking, live chat and phone calls.
- Designed 3 Make.com automations: lead routing to HubSpot and Google Sheets with de-duplication, CallRail call processing, and a daily closed-loop flow sending deal revenue to Google Ads as offline conversions.
- Configured GTM with GA4 key events, Meta Pixel event de-duplication, Consent Mode, enhanced conversions and CallRail dynamic number insertion; used GA4 Measurement Protocol for server-side call events.
- Built a Looker Studio dashboard (channel funnel, bookings vs. ad spend, cost per booking, ROAS by campaign); worked within HubSpot Free and Make Free limits via a Private App API.

AI Agent for Executive Outreach (CEO / B2B)

- Multi-agent pipeline with lead discovery, waterfall email verification, LLM signal extraction, regional copy localization (EN/ES/PT/DE), human-in-the-loop approval and reply-intent classification.

TagSentry — Tracking & Consent Compliance Auditor

Laravel 12 · Node.js · Playwright · MySQL · Python (openpyxl)

- Automated privacy-compliance audits (GDPR, CCPA/GPC, Consent Mode v2) with a 3-pass headless browser scan, a 7-check detection engine and GA4 consent-signal decoding.
- Built a bulk prospecting pipeline that queues Shopify stores from an Excel workbook, scans them overnight and writes PDF report links back into the sheet automatically.

AI-Powered Sales Lead Qualification & CRM Automation — Enriches inbound leads, scores intent with an LLM and syncs qualified prospects to the CRM with Slack alerts.

AI LinkedIn Content Generation & Publishing — Researches trending topics, generates on-brand posts with LLMs, then schedules, publishes and logs engagement automatically.

EDUCATION

B.Sc. Information Technology (BS IT) — Government College University Faisalabad 2018 – 2022
